

LONG-TERM CARE INFECTION PREVENTIONIST ESSENTIALS

FREE TRAINING IN INFECTION PREVENTION AND CONTROL FOR
LONG-TERM CARE WORKERS IN CONNECTICUT

Nov. 7-9, 2023 **OR** Nov. 14-16, 2023 **OR** Jan. 16-18, 2024

In partnership with the Connecticut Department of Health and Human Services, APIC is offering complimentary Long-Term Care Essentials Courses. **This course is valued at more than \$1000 and SPACE IS LIMITED, so early registration is encouraged. Register for only one date. If you cannot attend, please cancel at least five business days prior to ensure other registrants are able to take advantage of this opportunity.**

This intensive, foundational course benefits healthcare professionals in long-term care by providing training and competency-building to manage the unique challenges of infection prevention and control (IPC) in long-term care settings. It includes the topics Centers for Medicare and Medicaid Services (CMS) requires and also grounds the Novice IP in the role and practice of being an effective infection preventionist, including creating and managing successful IPC programs and mitigating risk at your facility.

To earn the LTC-IP Essentials Certificates and available CNE credits, participants must complete all program components:

- 2.5-days of live training led by experienced instructors. (Contact hours awarded for attendance and completion of evaluation.)
- 11 Online modules with knowledge checks and a final exam to reinforce learning
